

EAG Summary

The following is an outline of the presentation that we will make. EAG (along with other members of the CD) is responsible for a sizable chunk of work on the SDSS, but we also try to ensure that scientists can reserve time to engage in their research.

1. EAG

Who are we (scientists, postdocs, CP's, visitors, teachers & other people).

2. Current projects

Responsibilities on SDSS

Project status; end in 2005; extension to 2007

Data acquisition system and support at APO

Support from ex-ISD

Spares and replacements

Data processing

New data, imaging, PT, spectroscopy

Plate/tile making

Data reprocessing

Public data Distribution

Survey Planning

Survey Management

SDSS Cluster - support from CD

ARC funding - what we receive and how it is spent.

3. Research

Halo stars, Galaxy clusters, Star clusters, QSOs, Groups, galaxy evolution, killer asteroids

4. Special Projects

iVDGL/Griphyn

TAM cluster, where want to go.

NVO

5. Future projects

Story of PRIME, SNAP

Current status
